FOR PEOPLE WHO REALLY KNOW ABOUT ROOF WINDOWS

THERMOSTAT

Double low emission coating reflects heat back into the room. Heating is more efficient and energy bills are lower.

COMFORT GLASS

COMFORT GLASS – Keep warm and stay cool. Reflective but protective glass that keeps you warm in the winter and reduces your energy bills, whilst in the summer, it blocks 95% of UV rays, protecting your furniture and keeping you cool.

NOISE BLOCK

NOISE BLOCK – Enjoy the silence. Up to 50% less traffic and rain noise thanks to toughened 6mm thick external pane, advanced cladding system and laminated internal glass with two layers of sound reducing foil.

TITAN GLASS

TITAN GLASS – easy-to-clean coating. Exclusive titanium coating which saves time and hassle on cleaning windows.

MASTER WOOD

Our FSC certified, rigorously selected wood is obtained from Nordic pine, valued for its excellent wood density and resistance to difficult weather conditions.

The choice of wood ensures durability and hassle free maintenance.

MAX PROTECT

More than 75 years of experience. Highest manufacturing standards possible. Superior quality control tested independently to the highest standards. Toughened panes with lifetime guarantee against hail damage.

TAKE A LOOK AT OUR ROOF WINDOWS. THEY HAVE MORE FEATURES, A LONGER GUARANTEE AND A LOWER PRICE THAN ANY OTHER BRAND ON THE MARKET.
YOU CAN PAY MORE FOR LESS, BUT WHY?

Excellent protection against impact from both outside and inside.
Laminated inner pane with two layers of tear resistant foil.
Toughened outer pane, 6 mm thick.
Lifetime guarantee against hail damage.

All Dakea roof windows have 20 year transferable guarantee.
It provides additional value if you sell or rent your house within the next 20 years.

Dakea Quick Install collar (RUC) is made from one piece so it ensures 100% water tightness. Its squared surface pattern will help you to cut straight if necessary, making the installation even easier. It is a technically advanced product designed to protect the roof and water tightness of the construction.

Now Dakea Better and Dakea Ultima are also available in white! White painted roof windows are a perfect match with modern interiors and accommodate all aesthetic tastes. We only use water-based, 100% ecologically-friendly paints and varnishes.

ULTIMA DOES IT BETTER

COMFORT GLASS

ULTIMA WINDOWS WITH COMFORT GLASS KEEPS YOUR HOME WARM IN WINTER AND PREVENTS OVERHEATING IN SUMMER. THAT MEANS YOUR ROOMS WILL BE A PLEASURE TO BE IN ALL YEAR ROUND.

Energy savings

- ✓ Two different layers of heat reflecting and sun protective coating on panes - 8.
- ✓ Krypton filled pane construction: Krypton gas conducts heat by 46% less than the most frequently used alternative Argon
- ✓ Excellent U_w parameter of 1.2 W/m²k for the whole window

UV-ray protection

- ✓ The exceptional glazing blocks 95% of harmful UV rays while still letting the light in

RESULT:

**Cost savings on energy
Protection against fading of furniture and carpets**

SAFE GUARD

TO IMPROVE SAFETY WE USE AN ADVANCED SAFE GUARD PACKAGE THAT PROVIDES HIGHER PROTECTION IN CASE OF HEAVY IMPACT, GLASS BREAKAGE OR HURRICANE TYPE CONDITIONS. WE ARE SO CONFIDENT OF THE PROTECTION WE PROVIDE THAT WE OFFER A LIFETIME GUARANTEE AGAINST HAIL DAMAGE.

Advanced pane package

- ✓ 6mm toughened external glass - 1.
- ✓ 2x3 mm thick laminated inner pane, safety in case of broken glass - 2.

Exceptionally tight seal and fitting

- ✓ Advanced gasket system - 5.
- ✓ Highest air permeability class: C4
- ✓ Insulation foam collar (IFC) free of charge - 6.
- ✓ Underfelt foil collar (RUC) free of charge - 7.

RESULT:

**20 year guarantee
Lifetime warranty against hail damage**

NOISE BLOCK

TO HELP REDUCE NOISE FROM OUTSIDE, WE'VE CREATED NOISE BLOCK TECHNOLOGY. THIS REDUCES NOISE FROM OUTSIDE AND FROM RAIN BY 50% WHEN COMPARED TO STANDARD WINDOWS.

Noise Block technology reduces outside noise and the noise from rain by 50% more than standard windows

- ✓ 6 mm toughened external glass - 1.
- ✓ Laminated inner pane 2x3mm - 2.
- ✓ Two layers of sound reducing foil in laminated pane - 3.

Rain noise cut by 50% more than standard windows

- ✓ Flashing with noise-absorbing foil - 4.
- ✓ Two layers of sound reducing foil - 3.

RESULT:

**Reduction of external noise by 50% more than standard windows
Rain noise cut by 50% more than standard windows**

U_w 1.2 W/m²K

DAKEA ULTIMA IS PROOF THAT IN THE SEARCH FOR BETTER, WE HAVE NO EQUAL. THESE EXCEPTIONAL ROOF WINDOWS EXCEL WITH THEIR SUPERIOR TECHNICAL PARAMETERS, UNIQUE NOISE REDUCTION SYSTEM, INCREASED DURABILITY AND COMFORT.

Dakea Ultima has an innovative noise reduction system, which mutes up to 50% of traffic and rain noise. Superior energy efficiency of 1.2 Wm²/K is provided by outstanding glazing with two low-emission coatings and a Krypton filling. The pane preserves heat in winter and protects against it in summer. Additionally, it blocks 95% of the UV radiation to prevent colour fading. The external pane has an easy-to-clean coating, which saves time and hassle on cleaning windows. Dakea Ultima is reinforced and resistant to category II hurricanes. Its external pane is extra thick and toughened and the internal one is laminated to ensure full impact protection and a lifetime warranty against hail.

The solid wooden frame with a central axis of rotation has two layers of varnish and comes in two colours: natural wood and white.

We are so certain of the high quality of our windows, that we give them a 20 year guarantee - the longest guarantee on the market, with no registration requirement.

U_w 1.3 W/m²K

DAKEA BETTER IS A CLASSICAL, CENTRE-PIVOT ROOF WINDOW AT ITS BEST. WITH EXCEPTIONAL GLAZING, DAKEA BETTER ENSURES EXCELLENT ENERGY-CONSERVING PERFORMANCE, SAFETY AND COMFORT.

Dakea Better stands out for its glazing. It is equipped with a new Thermostat feature – double low emission coating that reflects heat back into the room and which means thermal transmittance of $U_w = 1.3 \text{ W/m}^2\text{K}$. Thanks to the new Thermostat, heating is more efficient and energy bills are lower. In addition, the internal pane is laminated for added safety in case of glass breakage. Together with the toughened outer pane that protects against impact from outside, they provide complete safety.

For added comfort, Dakea Better also has a ventilation valve and a handle with two additional locking positions for flexible ventilation control. The solid wooden frame has two coats of varnish and comes in two colours: natural wood and white.

DAKEA BETTER IS COVERED BY AN UP TO 20 YEAR GUARANTEE.

U_w 1.3 W/m²K

DAKEA BETTER PVC IS A PERFECT SOLUTION FOR HIGH-HUMIDITY ROOMS, SUCH AS KITCHENS AND BATHROOMS, THANKS TO ITS INCREASED RESISTANCE TO HUMIDITY AND DIRT.

Dakea Better PVC provides exceptional comfort. As it's made of PVC material, it's very low maintenance: the window is easy to clean, resistant and doesn't require treatment. Additionally, they have a ventilation valve and a handle with two extra locking positions for flexible and comfortable ventilation control.

Dakea Better PVC also stands out for exceptional glazing. Thanks to the new Thermostat solution, it has an excellent thermal transmittance of U_w 1.3 W/m²K, as well as toughened external glass and laminated internal glass making it more resistant and safe in case of glass breakage.

DAKEA BETTER PVC IS COVERED BY AN UP TO 20 YEAR GUARANTEE.

BETTER VIEW

INSTALLED IN A
PITCH OF BETWEEN
15 AND 90 DEGREES

U_w 1.3 W/m²K

DAKEA BETTER VIEW COMBINES A HIGH PIVOT WITH EXCELLENT GLAZING, TO PROVIDE EXCEPTIONAL COMFORT.

The high pivot construction of Dakea Better View means you can enjoy better panoramic views compared to centre pivot windows. It also makes opening, closing and adjusting the window easier.

The window's excellent glazing consists of a laminated internal pane and a toughened external pane to ensure safety. It also has a double, low emission coating that reflects heat - Thermostat - and provides outstanding energy-conserving performance.

The solid wooden frame has two layers of varnish, a ventilation valve and a handle with two additional locking positions. It all adds up to flexible ventilation control and improved comfort.

Dakea Better View meets the requirement for means of escape (with the exception of smaller size C4A).

THE DAKEA BETTER VIEW IS COVERED BY A 20 YEAR GUARANTEE.

EASY INSTALLATION ACCESSORIES

SLATE FLASHING | KSF **FOR 0-16 MM (2 X 8 MM)**

The slate flashing is suitable for flat roofing materials with a height of between 0-16 mm (2 x 8 mm). The tight flashing bottom part and the segmented side makes installation possible on all types of common flat roofing material, i.e. natural slates, manufactured slates or shingle. Not compatible with standing seam.

TILE FLASHING | KTF **FOR 16-50 MM**

The tile flashing provides you with safe, water tight installation for all the common roofing materials, fitting in the 16-50 mm high profile range. You can install your roof window on flat tiles above 16 mm, on concrete tiles, profiled ceramic tiles or even on corrugated metal roofing. Please note the flashing is not compatible with plain tiles. The lead-free aluminium apron ensures tight overlap on various tile types and roofing, and the weather resistant foam gasket makes the side connections water tight against snow and heavy rain.

UNIVERSAL FLASHING | KUF **FOR 16-120 MM**

The universal flashing fits the most common roofing materials in the profile height range of 16-120 mm. The extended and more pleated aluminium apron ensures perfect installation on high profile tiles and flat slates. Also available in black for Dakea Vintage roof windows.

FREE

**with Dakea ULTIMA,
BETTER, BETTER VINTAGE
and BETTER PVC**

UNDERFELT FOIL COLLAR | RUC **FULL WATER TIGHTNESS**

Reduces the amount of time required for roof window installation. Designed to protect the roof and increase the water tightness of the construction. Tear-resistant polyester fabric with a vapour permeable polyurethane coating.

- Highly fire resistant - B1 as per DIN 4102
- Tensile strength 350 N/5 cm (35 kp/5 cm)
- Conforms to DIN EN 12311
- Impermeability. Water tight DIN EN 13111
- Temperature resistance from -40°C to +80°C

PLAIN TILE FLASHING | KFP **FOR 0-28 MM (2X14 MM)**

The plain tile flashing features special profiled segmented side parts for plain tiles with a profile height of 14 mm (max length 340 mm). Suitable for a roof pitch range of 25°- 90°.

Also available in black for Dakea Vintage roof windows.

FLUSH FLASHING | KFF **FOR 0-16 MM (2X8 MM)**

The flush flashing is ideal for installation onto slates up to 8 mm in height, ensuring a perfect seal. The 40 mm deeper installation offers better energy performance and aesthetical benefits. For even better performance, RUC underfelt foil collar is recommended. Suitable for a roof pitch range of 20°- 90°. Please note the roller shutter and the foam collar is not compatible with the flush flashing. Also available in black for Dakea Vintage roof windows.

COMBI FLASHING | UCX **FOR 16-120 MM**

Dakea UCX combi flashing system is suitable for profiled tile and high profiled tile materials of 16 – 120 mm. Before installing, please ensure you take into account the distance between the windows and the rafter size.

The combi flashing system is made up of seven basic parts (boxes) that enable installation of the desired combination - from two or more windows side-by-side to two or more windows above each other. To see how it works use the **Compose Combi Tool** at www.dakea.com

FREE

**with Dakea
ULTIMA**

INSULATING FOAM COLLAR | IFC **MINIMISES HEAT LOSS**

For supreme insulation between the window and the rafters. The IFC collar forms an insulating frame around the window, restricting heat loss and moisture.

IFC also helps with easier, faster and faultless installation.

- Made of low density PEX-PELD.
- Dimensions of the profile: 20-30x90 mm
- Provided with a self-gluing strip for an easy and secure fit.

* For Dakea Good KDV B700, use IFCs - slim version of the insulating foam collar

COMFORT ACCESSORIES

DAKEA BLINDS ARE COVERED BY A 2 YEAR GUARANTEE

BLACKOUT BLINDS | DUR ALMOST 100% BLACKOUT

No cords and strings – our blackout blinds simply slide inside a slim profile aluminium frame.

This easy mechanism allows multi-positioning of the blind, giving easy control of light in the room, providing varying levels of brightness down to 100% blackout.

No washing – durable, dirt-resistant combination of polyester and lightproof rubber fabric make blinds care-free and easy to clean without reinstallation.

ROLLER BLIND | RHR DIFFUSE LIGHT

Roller blinds give you that ever-popular softly diffused light effect.

They are a practical and low cost option to bring shade.

No cords and strings – our roller blinds use a simple robust roller mechanism that allows positioning at three different levels.

Made of polyester fabric, they are durable and can be cleaned easily.

VENETIAN BLINDS | PAR FILTER LIGHT

No cords and strings – Dakea venetian blinds offer neat cordless operation.

Varnished aluminium slats make them ideal for humid environments such as kitchens and bathrooms.

A stylish and classical way to gain total control of the amount and direction of light in a room.

MULTIFIT

WHAT DOES MULTIFIT MEAN?

It means that the product is compatible with Dakea, VELUX® (including new generation - V22), Fakro®, RoofLITE®, Keylite®, DAKSTRA, Optilight® and Starlite® windows.

4260

ANTI-HEAT BLIND | MIR **100% SHADE AND** **THERMO-REGULATION**

Dakea external anti-heat blinds prevent over-heating without obstructing the view.

They are made of a semi-translucent, PVC coated net which pleasantly diffuses incoming light and prevents over-heating by stopping 60% of the sunlight without restricting the view.

Anti-heat blinds MIR are compatible with all roof windows of Dakea, DAKSTRA, RoofLITE® (product code: MIR) and VELUX® (product code: MUR).

ROLLER SHUTTER | SHR **100% EXTERNAL PROTECTION**

The Dakea roller shutters ensure peace and quiet.

In case of external noise or heavy rain, shutters can be closed easily thanks to their electrical system.

Additionally, they protect the window against exterior impact, e.g. broken branches during a storm.

They can also improve the U-value up to 0.3 (based on CSTB calculation).

The roller shutter is very easy to mount, even on a previously installed window. They are compatible with IO-Homecontrol® system.

Dakea roller shutters are covered by a 10 year guarantee.

* Roller shutters SHR are not compatible with VELUX Integra windows, VELUX New Generation windows and recessed installation.

When using combi UCX, installation is only possible on the top windows.

ELECTRICAL OPENER AND **HANDLE EXTENSIONS** **EASY REACH AND SAFETY**

Dakea electrical opener AMC100 with its remote control, improves the ease of using the window.

It's also equipped with a rain sensor that closes the window automatically if it rains.

AMC 100 have CE marking and a 2 year guarantee.

Handle extensions ZAR help to operate the window. They are suitable for all Dakea windows. They are made of metal with a rubber grip for ease of use and come in two lengths: 80cm and 120cm.

*Electric opener AMC 100 is not compatible with KDV B700
